1 Introduction

The data science become bigger by the improvement of economics. I would like know more about the application of big data. Like from the predictive analysis to get the better arrangement. I believe data science will applied into a lot of stuffs. I am interested in big data. And I think data science must be useful in the future. I wanna learn how to use data science to make informed decisions. It is a important skill each company. I want to know the knowledge about how to get useful information through a faster way. I have not a plan for after graduation. Maybe continue study or find a job.

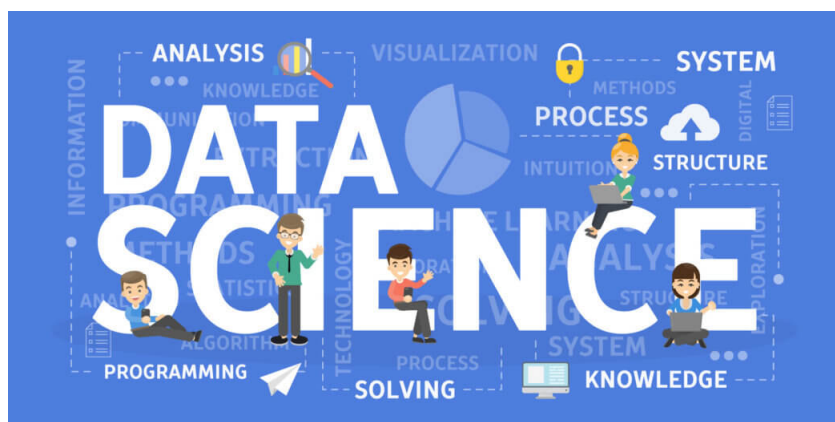

Figure 1: data science

2 Equation

$$a^2 + b^2 = c^2$$
